

**THE GRANGE**  
**ANGUS**

**Complete Stud Herd Dispersal**  
**SALE OF HIGH VALUE ANGUS GENETICS**

**500 LOTS SELL**  
29th & 30th October 2009

Dear Angus Breeder,

We welcome you this spring, to a one-off event, the complete dispersal of The Grange Angus Stud Herd. All registered cattle will be available for sale.

This Sale will present breeders with a unique opportunity to access unequalled Angus genetics. We have bred to produce the most elite pedigrees available, ie rather than pursue high volume of more mid-range genetics. The herd has then been ruthlessly managed for structure, phenotype, temperament and fertility.

We hope the volume of both pregnancies and young cattle being offered, will present Stud and Commercial Breeders with a premium yet affordable opportunity. As this season takes shape, re-stockers will have a great opportunity to come in at the highest genetic level, rather than start by buying seconds.

Most cattle are HBR, with a high percentage of ETs. Very few animals are only APR. We also invite you to consider the merit of the pedigrees and urge you not to miss out on a rare chance to infuse these elite genetics into your breeding program.

After the Sale, any animals remaining will form a very sound base for our ongoing commercial herd. I have recently been asked why the Stud is being sold. The answer is simply that this is a full time job, that requires a lot of time, a commodity which I lack. This herd deserves a full time commitment. I trust that by dispersing, these magnificent and deserving animals will all find an ideally suited program.

Again, we welcome you to what will hopefully be a highlight on this years Angus calendar and invite you to consider including these genetics in your breeding program.

We are extremely proud of these cattle. They will be missed. I hope to see you at The Sale.

Best wishes

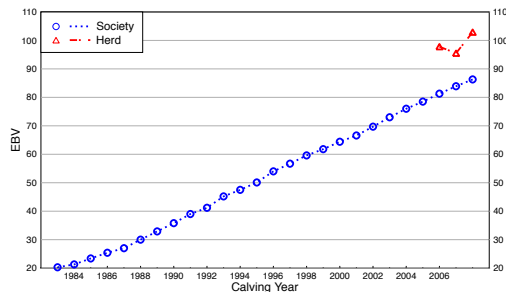

David Kirwan  
Principal, The Grange Angus

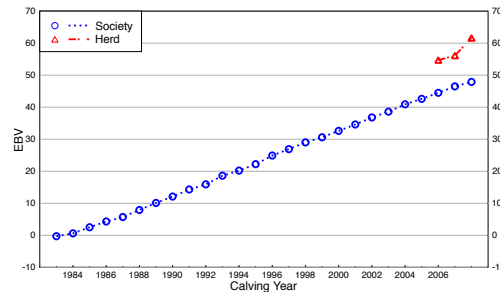

## Group Breedplan Graphs (The Grange Herd Average for the Last 3 Years)

As the graphs below show, these powerful pedigrees have been selected for the features that commercial cattle breeders get paid for.

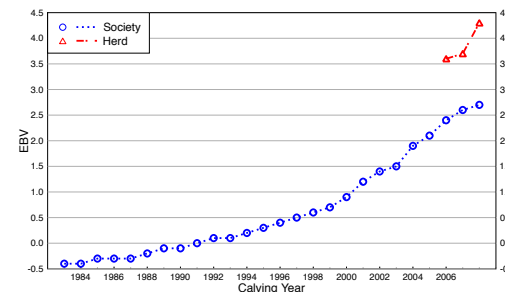

600 Day Growth (kg)

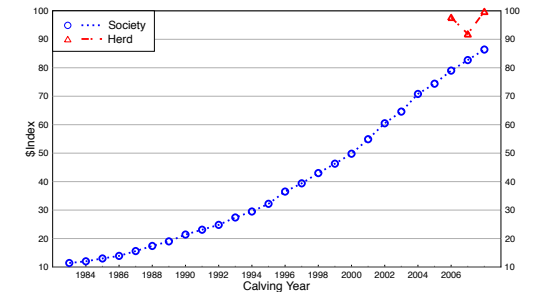

Carcass Weight (kg)

Eye Muscle Area (sq cm)

Long Fed / CAAB Index

All Stock Drenched, Vaccinated, AM & NH Status Declared, Herd MN1 protected.
